

ELGI bags deals from steel majors

ELGI Equipments Ltd, Asia's largest air compressor manufacturer based in Coimbatore has bagged orders worth Rs.32 million in separate deals with two steel majors. Under these pacts, Elgi Equipments will supply latest generation centrifugal air compressors (CAC) on a turn key basis to JSW Steel Limited (formerly known as Jindal Vijayanagar Steel Ltd) and Visvesvaraya Iron and Steel Plant. The Centrifugal Air Compressor offered by Elgi is called "Turbo Master" and its power ranges from 400 HP to 1500 HP. Its capacity will vary between 1400 cfm and 8500 cfm with an air pressure range of 3 to 14 bar. The Turbo Master products bring cutting-edge technology for compressed air applications at affordable prices.

With these deals, Elgi Equipments charts its path for aggressively foraying into the growing industrial domains like steel, textile and auto ancillaries that are emerging as new business sectors for CAC. Elgi intends to leverage its strength in R & D by pursuing new business opportunities created by developments in technology for offering a bouquet of customised products and services.
